

## STAFF ILLNESS PROTOCOL

**Remember, the best way to prevent the spread of infection is hand washing and staying home when you are sick.**

When do I stay home?

SYMPTOMS	DO I STAY HOME?
<b>DIARRHEA</b> Frequent, loose, or watery stools compared to normal that are not caused by food, medicine, or a known health concern.	<b>YES</b> -Staff may return 24 hours after the last episode of diarrhea unless caused by an illness that requires them to stay home longer or a healthcare provider says it is not contagious.
<b>FEVER</b> A Fever of 100.1 °F or above	<b>YES</b> -for at least 24 hours after the fever is gone, without the use of medicine that reduces the fever.
<b>“FLU-LIKE” SYMPTOMS</b> Fever over 100.1 °F or above with a cough or sore throat. Other flu symptoms can include tiredness, body aches, vomiting, and diarrhea.	<b>YES</b> -for at least 24 hours after the fever is gone, without the use of medicine that reduces fever.
<b>VOMITING</b> Throwing up that is not related to activity, or coughing, a known health condition, or self-induced.	<b>YES</b> -You may return 24 hours after the last episode of vomiting unless caused by an illness that requires you to stay home longer or a healthcare provider says it is not contagious.
<b>RASH</b> Not related to sunburn, a known allergen, or a new medication.	<b>NO</b> <b>YES</b> -with fever. Any rash that spreads quickly has open weeping wounds, and/or is not healing should be evaluated by a healthcare provider before returning to school.
<b>MILD RESPIRATORY OR COLD SYMPTOMS</b> Stuffy nose with clear drainage, sneezing, and coughing.	<b>NO</b> -If you can perform regular duties and do not have a fever. <b>YES</b> -If you have multiple illness symptoms, fatigue, fever, green or yellow nasal drainage, and productive cough.
