

## **Energy**

The single most expensive commodity purchased by Ganado USD is energy. It is our goal to reduce and conserve energy to the maximum amount possible. This can only be done with the assistance and cooperation of all district personnel. This will allow us to divert monies that would have otherwise been spent on energy for other, more high-priority district needs.

You may want to consider the following tips to conserve:

- Use lighting only when natural lighting is insufficient to provide proper working conditions, safety and security.
- Turn out the lights in an area as you leave.
- Turn on energy-consuming equipment only when it is needed.
- Purchase energy-efficient equipment only whenever possible.
- Limit/control use of facilities during 'off hours'.
