

Propane Bid Specs School Year 2026-2027

Three (3) tanks behind the school are 1,000 gallon each, also one (1) 500 gallon tank at the bus garage. All tanks owned and maintained by the company providing the propane. Winning bidder would be responsible for tank change-outs with associated cost, if required, provide the annual system leak test report to the state and be able to respond to help detect a leak in the system, if needed.

Estimated 10,000 gallons per school year, July - June (no minimum requirement per delivery)

Note: if tank swap is needed, it must occur while school is not in session, for example, July.
