Tired of re-keying your Titlewave orders into your acquisitions or purchasing system? We've done the work for you. Select a download option below to convert your Titlewave list into a format your system can recognize, then upload the list file into your system for purchase.

Choose a download option:

- ☒ **SB13: District Collections Download**
Shows which titles are new to the district collection. Includes multiple ISBNs when available.
- ☐ **Download with Journal Reviews and ISBN**
Standard Excel download with journal reviews including Booklist, School Library, Horn Book, and others.
- ☐ **Microsoft Excel (XLS) Spreadsheet**
This option will download your list as a Microsoft Excel (XLS) Spreadsheet.
- ☐ **Comma Delimited (CSV)**
This option will download your list in comma delimited (CSV) text file format. This file puts data into columns, separating them with commas and closing each item in quotes. It is best viewed using a text editor such as Microsoft Word, Text Edit (Mac) or Notepad (PC).
- ☐ **Tab Delimited**
This option will download your list in tab delimited text file format. A tab delimited file is a plain text file with a tab between each column in the text. When imported into a software application such as Microsoft Excel, the tabs allow the columns and information to line up properly.
