ANGWIN
POWER RELIABILTY

OUR MISSION:

Bring Angwin area residents together to document outage impacts, get clear answers, and advocate for safer, more reliable power.

WHAT WE'RE ASKING PG&E:

1. **What's finished?**
   Which undergrounding projects are complete and supplying power?
2. **What remains vulnerable?**
   Which overhead lines and equipment are still at risk of causing outages?
3. **What happens next?**
   What additional improvements are planned, and when will they be completed?
4. **Why are outages happening?**
   What role have equipment failures, construction, or safety settings, played?
5. **How will we know it's working?**
   How will PG&E measure and share improvements in Angwin's power reliability?

These draft questions are a starting point. Community input will help shape our requests.
