Associate of Arts in Community and Public Health

The Community and Public Health degree is designed for students who intend to transfer to a Bachelor of Science in Community and Public Health (BS CPH) degree program. Students should contact the university that they intend to transfer to for specific requirements for their Nursing degree program. This degree equips students with the knowledge and skills to address critical health challenges at a broader level. Public health is a robust and growing field that can lead to career opportunities across a variety of sectors such as federal, state and local governments, private corporations, and non-governmental organizations.

Program Learning Outcomes:

1. Demonstrate foundational scientific knowledge, vocabulary, and skills appropriate for students seeking careers in community and public health.
2. Identify community public health issues and propose a culturally appropriate solution that incorporates cultural core values.
3. Compare the organization, structure, and function of healthcare, public health, and regulatory systems at local, tribal, and national levels.
4. Discuss how structural bias, social inequities, and racism impact health and create challenges in achieving equity.
5. Communicate culturally informed public health content effectively, both in writing and in oral presentations.
